

## Animation project for Brastyl Greeba

OK - We usually have a go at some animation this time of year and link it with the school play - but this year the play is all audio so do join in the songs if you can.

For the animation - here is what I propose for a bit of fun.

With a piece of fruit or a vegetable can the children please choose a nice background or paint one if they wish.

For example - if choosing an apple - maybe paint an apple tree to pretend it's hanging off a branch or a strawberry plant etc...

If you don't have time or paint etc... use a table top/plate or grassy patch in the garden.

You will need a device that takes pictures that you can send to me - information about direct contact with me to follow. Keep your eye on the uploads for our planning\*

Place the fruit on the background whole - take a picture

Take a bite from the chosen piece of fruit.

Keeping the camera in the same place - take a picture

And so on, until the fruit or vegetable is all gone!

Send me the images. I will pop them into an animation package and we should have our fruit and veg being gobbled up in a little film. I can link all the films together and we should have a class animation to upload on the website.

Hope you like this idea and if you want to get involved please do.

\* I do apologise that this has not been available but I had a particularly drawn out, nasty strain, of flu and post viral asthma and I am still signed off by my doctor to isolate and currently have no voice. I am starting to feel much better and I hope to provide a more active approach to our online platform.
